Media kit

Photos available for media use

The following images are available to accompany media coverage of the CASCADES Expedition. High-resolution versions of all images can be downloaded from the press kit. Please credit each image as indicated below.

The first five photos are provided by Amundsen Science and illustrate the Canadian Coast Guard research vessel, the CCGS *Amundsen*, in the Arctic environment in which the CASCADES Expedition takes place.
The following photos are provided by François Bernard, who participated in Leg A of the CASCADES Expedition in the summer and documented the journey and the scientific research carried out onboard.
